

# To add the E2BN Protex trusted root certification authority to a Group Policy object

Download the .crt file from <http://protex.e2bn.org/certs/>

[http://technet.microsoft.com/en-gb/library/cc738131\(v=ws.10\).aspx](http://technet.microsoft.com/en-gb/library/cc738131(v=ws.10).aspx)

1. Open the Group Policy object (GPO) that you want to edit.
2. In the console tree, click **Trusted Root Certification Authorities**.

## **Where?**

- *Policy Object Name*/Computer Configuration/Windows Settings/Security Settings/Public Key Policies/Trusted Root Certification Authorities
3. On the **Action** menu, point to **All Tasks**, and then click **Import**.

This starts the Certificate Import Wizard, which guides you through the process of importing a root certificate and installing it as a trusted root certification authority (CA) for this GPO.
